

As a designated **MSCA GreenSTAR** contractor, we have been recognized by the Mechanical Service Contractors of America (**MSCA**) for our commitment to environmental responsibility and expertise in sustainable systems, services and solutions.

As an **MSCA GreenSTAR** contractor we have what it takes to provide you with energy efficient, cost-effective solutions for all your indoor environmental needs.

Whether it's service and repair, planned maintenance, replacement or retrofit, our expertise in high-performance building operation will ensure peak operating efficiencies while reducing your bottom line.

Stringent **GreenSTAR** Criteria Prove We have What it Takes!

As an **MSCA GreenSTAR** contractor, we have clearly demonstrated our knowledge and proficiency in environmental service excellence by:

- Attaining **MSCA STAR** Qualified Contractor status
- Employing LEED Accredited Professionals
- Being a member in good standing of our local United States Green Building Council Chapter
- Providing our employees with the latest training
- Providing our customers with the services and products they need to save money and energy
- Implementing an internal green philosophy
- Participating on a registered LEED project team

The Mechanical Service Contractors of America (**MSCA**) is the nation's leading organization representing heating, ventilating, air conditioning and refrigeration contractors. **MSCA** has been recognized by the U.S. Green Building Council for its leadership and stewardship in the HVAC industry.
